

EHC LED A23 Bulbs provide excellent distribution while dispersing clean and even light. These LED bulbs are built with an efficient, heat dissipating design to ensure a long lasting lifespan. They save on average 70-80% on electrical usage and do not require the use of a ballast.

EHC LED A23 Bulbs are great for bollards, decorative post top lights, can lights, low bay fixtures and more. These eco-friendly bulbs contain no mercury which eliminates the disposal fees of traditional bulbs. Upgrade your lights today and save!
