

Energy Harness® LED Slimline Shoebox luminaires have a unique low profile design intended for outdoor pole or wall mounted applications. They combine the latest in LED technology along with high-performance “clean bright light” for secure illumination and maintenance free operation.

Ideal for replacing between 400W - 1000W metal halide and high pressure sodium lighting with energy savings of 65 - 75%. Great for parking lots, street lighting, walkways, pedestrian crossings, high security areas and side walks.

Give your fixtures a modern look while upgrading your light output, all with reducing the cost of your energy!

Energy Harness® LED Slimline Shoebox fixtures are available in a variety of sizes and wattages to meet your lighting needs. These fixtures have even optical light distribution and great heat dissipation which allows for a longer lifespan and requires no maintenance.
