

Energy Harness® Integrated LED Lighting provides a modern design that is a smart alternative to fluorescent lighting. This unique design allows for these products to be used as their own fixture or mounted inside of existing fixtures. Integrated LED tube lights are safer than fluorescent tubes as they do not contain mercury or glass. Great for ceilings, shelves, coolers, under cabinets, soffits, signs and more...!

EHC Integrated lights are maintenance free because they do not use ballasts. They are wired directly to A/C power for improved reliability, and can be easily daisy chained together from a single power source. The T8 Integrated Tubes are available in T8 Singles and V-types, both in a variety of sizes and colors to meet your needs.

EHA-ONOFF-CABLE (3')
Sold separately

Specifications

- CRI>80
- 100-277VAC 50/60hz
- Beam angle > 120° for single, 240° for V-type
- Isolated internal driver
- Power Factor >0.9
- Working Temp: -22°F - 140°F
- IP40 rated
- Efficacy: 105lm +/- 5lm
- Aluminum Housing
- Ballast bypass
- Semi-frosted, clear PC cover
- Isolated internal driver cover
